Vision

the buttons on the setting gallery can not be clicked into.
This might be intentional but the ui makes it seem like it should

Recommendation: From account I can have the setting tab, instead of Account settings
being on dashboard

No error pop-up if password does not meet requirements, only shows it loading.

1) Logged in.

2) Click on sightings → Gallery

3) Goes to All sightings then switches over to my sightings with no prompt.

4) Should go to one or the other.

5) None.

⊗ AI Bot was unavailable on first attempt

① logged in

② first thing I did was try to use chat bot

③ it said unavailable

④ afterwards it worked later

- Deleting a notification probably doesn't need confirmation of deletion.

Testing AI companion

- 1) Using the AI companion to ask questions
- 2) clicked on AI companion, asked a question w/ typos on purpose
- 3) says "AI companion is temporarily unavailable. Try again later"
- 4) AI to work / understand question w/ typos
- 5) Next time I asked question with no typos, worked fine

Auditas: Typing Heads.

Our group: Dynamic Engineering Squad
Testing: Monmouth Hold'em

Bug 1:

1. Lat & long does not populate automatically
2. upload a sighting
3. Lat & long are both $\emptyset$
4. Lat & long populate automatically
5. N/A

Bug 2:

1. Resending an email verification does not work. 500 error
2. Attempt to login without verified email, then attempt to resend email
- 3.

Bug 3:
